When it comes to CHFI Certification, it is an in-demand certification course designed by the experts at EC-council. With the assistance of the respective certification program, you are able to stay ahead of others in terms of having the proper know-how of investigating and detecting cyber-attacks. Our CHFI v10 certification is a perfectly devised course to help you avail of certification without any hassle.
The CHFI certification course has been developed and designed by digital forensics practitioners and professional SMEs. It is basically a complete vendor course that covers the major forensic investigations involving advanced technologies and solutions. The CHFI course will give you a proper understanding of the detailed labs. More than 50 percent of the training time is committed to the labs. The CHFI course also covers the appropriate skills and knowledge bases to match with the regulatory compliance standards that include ISO 27001, PCI DSS, SOX, HIPPA, etc. The CHFI course also presents a repeatable forensics investigation methodology that is needed from a digital forensic expert that can enhance your employability.

If you are willing to pursue CHFI certification then you will be learning more about different security disciplines related to digital forensics. It will help you learn how to maintain security ethics from the vendor’s point of view. It is an extensive course that helps you learn more about major investigation situations and helps students to get the experience of different types of forensic investigation procedures and tools taken into consideration for the purpose of the forensic investigation so that the prosecutors can be prevented from any kind of issues.

While pursuing the course of CHFI Certification, participants like law enforcement personnel, security officers, system administrators, military and defense personnel, legal experts, security professionals, and whoever is concerned about the integrity of the network infrastructure will be able to enhance the skills of performing digital forensics investigation. Take a look at what the CHFI course is all about:
Assess Cyber Risks:
This course helps you enhance your understanding of assessing different cyber risks and vulnerabilities that can exploit an IT infrastructure.

Exam Information
Below mentioned are the CHFI v10 Exam details that you need to pass to become a certified Computer Hacking Forensic Investigator, take a look:

- **Number of Questions**: 150
- **Test Format**: Multiple Choice
- **Test Duration**: 4 Hours
- **Certification Name**: CHFI ECO 312 - 49
- **Test Delivery**: ECC EXAM PORTAL

As per the individual ratting, we will be assessing the cut score for all types of exam forms. The cut scores can range between 60 to 78 percent

Reporting:
CHFI certification authorizes the expertise of security experts when it comes to reporting cyber-attack incidents or hacking attempts in the courts of law.

Cyber Forensic Techniques:
With the assistance of CHFI v10, you get to enhance your understanding of various cyber forensic techniques, footprints collection, forensic tools, and many more important components for forensic investigations.

Advance As Forensic Investigators
Our CHFI Course has been devised to train the experts intending to have a remarkable career as Forensic Investigators and provide their security services with utmost proficiency.

Proper Detection
With the help of CHFI v10 certification, the cyber investigators are able to assess the incidents such as theft of confidential data, intellectual property exploitation, trade secret compromise, and more.

Assess Cyber Risks:
This course helps you enhance your understanding of assessing different cyber risks and vulnerabilities that can exploit an IT infrastructure.
Training Objectives

Successful completion of the certification training empowers you with across the board understanding of:

> Pursuing the same will help you get a proper understanding of threat intelligence and a crucial understanding of the points that support and scenario modeling pro-active profiling.
> To work on an anti-forensic process for the purpose of detection.
> Learn to execute post-intrusion analysis of digital and electronic media to assess who, where, what, when, and how the intrusion happened in the CHFI v10 training.
> You will learn to assess and extract logs from different devices in the form of firewall, IPS, IDS, laptop, desktop, servers, SIM tool, firewall, DHCP logs, switches AD server, Access Control Logs & conclude as part of the investigation procedure.
> Learn to Assess and check incident source and origin.
> You will also learn to recover deleted files in different operating systems.
> You will also learn to work on reverse engineering for suspected and known malware files
> You will be learning the process of collecting data for the purpose of forensic technology priced in accordance with the evidence handling process.
Course Content

Pursuing the respective CHFI certification course will help you learn about the methodological approach of performing computer forensics that includes seizing, searching, acquisition, preservation, chain of custody, and reporting and analysis of digital evidence.

Take a look at the outline given below:

Module01 - Computer Forensics in Today’s World
Module02 - Computer Forensics Investigation Process
Module03 - Understanding Hard Disks and File Systems
Module04 - Acquisition and Duplication
Module05 - Defeating Anti-Forensics Techniques
Module06 - Windows Forensics
Module07 - Linux and Mac Forensics
Module08 - Network Forensics
Module09 - Investigating Web Attacks
Module10 - Dark Web Forensics
Module11 - Database Forensics
Module12 - Cloud Forensics
Module13 - Investigating Email Crimes
Module14 - Malware Forensics
Module15 - Mobile Forensics
Module16 - IoT Forensics
Overview

Securium solutions is the eminent medium that provides cyber security online training courses. Our courses run under the true mentorship of digitalization that is circulated by pre-planned modules to not merely teach but educate by advanced means.

Spot the difference in its approach to derive its value. Within a professional frame, our cyber security certifications online are not just for a defining point till a specific accreditation. These modules are correlated to basics which never change with advanced mechanisms. Nonetheless, our courses keep this course fragmentation at the rooted specification that doesn’t reform even after a century.

We provide online training in disciplines such as Cyber Security, Cloud Computing, Project Management, Digital Marketing, and Data Science among others, where technologies and best practices are changing rapidly and demand for qualified candidates significantly exceeds supply. We have deployed training to millions of professionals and companies so they can have upgraded skills and become certified to know the worth of their organization.
